

Dayton Dental Society Presents:

Daniel German, DDS

**“Digital Dynamite Turns Orthodontics
Right Side Up”**

Friday, November 12, 2021

~ Sinclair College, Bldg. #12 ~

444 W Third St., Dayton, OH

~ 6 CEUs ~

Registration 8:30am

Seminar is 9:00am – 4:30pm

This course highlights many compelling reasons why the GP office is a wonderful place for patients to receive orthodontic care. Research confirms that the patient’s satisfaction with orthodontic care is universally positive whether treated by a specialist or GP. This course outlines a formalized method of planning, support, and education between GPs and orthodontic specialists using a collaborative software platform. Dr. German provides easy to understand rules of thumb for the inexperienced dentist to choose patients with the most predictable problems to treat. Appreciate the importance of excellent diagnostic records and diagnosing essentials. Understand the boundaries of teeth movement for aligner and braces treatments. Orthodontists can learn how they can use their knowledge to help plan treatments for dental colleagues as the delivery of orthodontic care is transforming. This seminar will emphasize the broad range of methods for creating patients that are raving fans because of their experience in your office, hence the entire team will benefit from the course.

At the conclusion, the participant should be able to understand and apply these to their practice/office:

- 1) Reasons GPs Should Provide Orthodontics
- 2) Evidence-based Proof GPs Do Great Work
- 3) Unmet Need for Orthodontics
- 4) Profit Opportunity for GPs
- 5) 7 Goals for an Ideal Outcome
- 6) 12 Essentials for Every Orthodontic Patient
- 7) Case Selection and Timing Treatment
- 8) Interceptive Care with Airway Friendly Treatments
- 9) Boundaries of Teeth Movements
- 10) Understand and Debate Different Perspectives on the New Delivery model: Your Questions and Comments are Encouraged
- 11) Increase Practice Enjoyment
